MG20XU 20 Channel Audio Mixer with Built-in Effect(YAMAHA)

Features

- Up to 10 microphones / 16 line inputs (8 mono + 4 stereo)
- ➤ 4 group bus + 1 stereo bus
- ➤ 4 AUX (including FX)
- ► "D-PRE" speaker, with a reverse transistor circuit
- Single knob compressor
- Advanced effects: SPX, with 24 sets of preset effects
- > 24-bit / 192kHz2 in / out USB audio function
- Connect to iPad (2 or higher) via Apple iPad Camera Connection Kit / Lightning to USB Camera Adapter (connection adapter)
- > Contains Cubase Al DAW download software
- > PAD switch on mono input channel
- ► +48V phantom power supply
- > XLR balanced output
- > The world's internal internal power supply
- > Includes cabinet installation kit
- Metal body

Description

MG series has intuitive, easy to use interface, including from 6 channels to 20 channels in a variety of models, suitable for a variety of users and usages. The firm structure and flexible design make the series create the highest performance, best sound quality and stability in applications such as installation, recording and live performance.

The newly released MG series of rich mixer product lines are suitable for a variety of mixing environments. This powerful product line includes a variety of channel configuration models and models with SPX effects and USB audio interface, which can be mobile or fixed for various applications such as live sound and recording, so as to meet the requirements from the monitor to meetings, live performances such as sound reinforcement and other needs of the application environment.
