

## HD8007 HD Video Conference Camera

### *Features*

- 1/2.8 inch HDCMOS sensor with 2.1 million pixel, 1920x1080 resolution, output frame rate up to 30 frame/s
- 3D noise reduction algorithm, low noise, USB2.0 video output in multiple formats, support HD video standard such as 1080P30
- RS-232C/RS485 remote control (VISCA protocol/ Pelco-D/Pelco-P)
- Support ten preset positions through serial port or remote control
- With an easy-to-operate remote control to make basic settings and set relevant parameters

## Description

PTZ HD color Camera with 30FPS high frame rate is suitable for enterprise, education and telemedicine applications. High-quality color video images can be captured in corporate meeting rooms, classrooms, training centers and medical rooms. Users can connect it to HD display device via USB2.0 cable to watch.

Precise, smooth, and quiet PTZ control allows the camera to reproduce clear images easily and quickly without any interference from the speaker or audience.

The use of Sony sensitive EXMOR CMOS image sensor ensures a delicate full HD image and a high level of resolution. The maximum 30FPS high frame rate operation ensures that natural, clear picture quality of the moving target being photographed is reproduced. It can automatically receive VISCA commands and PELCO-P/D protocol commands. You can choose to use RS232 or RS485 interface to do the connection.

## Display

Dimension: 111mmX109mmX130mm
