

DSP602BT

Bluetooth Ceiling Speaker

Features

- Ceiling Loudspeaker adopts the fashionable thin-edge plane big cylinder and the carbon alloy aluminum mesh design with the RAL white coating.
- Equipped with a 6.5" unit, full-range designed loudspeaker with magnetic circuit encapsulated with special engineering plastic process, and the drum paper formed with tripping and hot pressing of algae salvaged organisms.
- Bluetooth 4.0 wireless connection, music play arbitrary.
- Built-in amplifier in the main box, can realize two-channel stereo play with the sub-box.
- Conforms to the IEC 268-5 PHC standard, capable of operating for 100 hours at rated power for analogue acoustic feedback exposure (SAFE) testing, which can withstand twice the rated power in a short period of time, ensuring the high reliability of loudspeaker in extreme conditions.
- Powerful clip design, durable and reliable, easy to install.

Note: As this device has line priority function, the Bluetooth function cannot be used when there is a line input.

Description

DSP602BT is a coaxial two-way Bluetooth ceiling speaker, with wide angle of proliferation, big output power, easy to install, and it can super reproduce voice and music. It is ideal for places where you need to install a ceiling speaker and ask for excellent sound quality.

Specification

Item	Parameters	
Amplifier output	Output Power(PEAK)	2*10W
	SNR	≥81dB
	Channel separation	>60dB
Speaker	Bass unit	6.5 inch
	Sensitivity	90dB±2dB
	SPL	98dB±2dB
	Freq. response	110Hz-15KHz
	Distortion	≤5%
Bluetooth	Version	BT4.0
Power	Voltage	AC100V-240V 50Hz/60Hz
Dimension	Diameter×H(mm)	Φ190×105mm
Weight	Net weight(kg)	1.0kg
