

DSP117 Wall Mount Speaker

Features

- Clear and bright sound
- Designed specially for cost-sensitive applications
- Streamlined appearance and integrated design allow it match with different decoration style
- Small volume with built-in audio transformer
- Used to play music and broadcast

Description

DSP117 is a wall mount speaker with a built-in 70V/100V transformer. The 70V/100V transmission is realized in a high-voltage and low-current mode, which makes longer distance transmission and parallel connection of multiple loudspeakers possible. It's made of high quality ABS environmental-friendly material, which is safe and durable; High sensitivity 90dB±2dB, long life span, clear and sonorous sound.

It is widely used in schools, gyms, squares, parks, parking lots, train stations, airports, villas, supermarkets and shopping malls. It is an ideal choice for public broadcasting.
